

INT RODUCING THREPOLY

Test further. See more.

3.0

Bulk-file performance testing. Read-only AI insights.
Private-infrastructure monitoring.

A NEW LEVEL OF VISIBILITY

01 / CAPACITY TESTS

Know how your workload performs.

Measure bulk-file round-trip performance and throughput. Configure file count, size and upload concurrency, then check completion against Target and Maximum thresholds.

02 / THREPOLY MCP SERVER

Ask your data. Get a clearer view.

Securely access read-only Threpolym insights through supported AI assistants. Ask about health, outages, security and performance, without changing your configuration.

EXAMPLE QUESTION
"Summarise recent outages."

03 / INTERNAL AGENT

BETA

Extend visibility. Inside your network.

Monitor and perform security tests on private, on-premises infrastructure. Run tests from your own environment while managing Internal Agents through the Threpolym dashboard.

Private infrastructure.
Centrally managed.

LATEST 3.0 ENHANCEMENTS

Clearer operations. Stronger protection.

See the issue. Understand the change. Protect your access.

LIVE DASHBOARD

One view of your MFT operations.

Bring Application health, transfers and security into one workspace. A shared Application filter keeps every section focused on the same Applications.

FROM OVERVIEW TO EVIDENCE

Open the monitoring detail behind the summary.

DEEPER OPERATIONAL INVESTIGATION

Understand what changed.

Compare current Heartbeat results with a historical baseline. Performance Changes bring detection context and activity history into view.

Go deeper in Target Inspector, Connection Analysis and Capacity Reports.

MULTI-FACTOR AUTHENTICATION

Add another layer of protection.

Protect password-based accounts with an authenticator app, one-time recovery codes and an optional 30-day trusted-machine period.
